

Learn about the limited fee schedule

To help control the cost of using out-of-network doctors and medical facilities, for 2009 the district has established a limited fee schedule. This means that if you use an out-of-network facility for non-emergency services, you will not only pay a higher coinsurance, but you will also be responsible for paying the difference between the fee schedule amount and the amount the facility charges. To help avoid these charges, make sure you use a network facility for all non-emergency services.
